Subject: Microsoft Settlement

I am writing to express my concern over the currently proposed terms of the settlement between Microsoft and US DOJ and various state attorney generals.

I feel the current settlement terms are letting Microsoft off too easily and giving Microsoft future capabilities to further empower their monopoly by taking on legal battles with open source projects.

Microsoft is guilty as charged and should not be given a remedy which would in any way allow them to grow their empire. Please review the settlement terms and consider revising them appropriately.
